

CLASSEN®

DOOR **CATALOGUE**

2021

Hard Edge PF door leaf profile PF

Rounded edge of the door leaf with a radius of 4mm, finished with elastic CPL laminates, obtained thanks to modern technology - postforming. Characteristic features - abrasion resistance and safety.

**Classen Primo**

Basic group of woodgrain veneer, impregnated, characterised by a required high scratch resistance.

Hard Edge K door leaf profile

Widely used, aesthetically executed edge with K rebate profile is a standard finishing of a door leaf. K edge profile is stylish and always in fashion.

**Classen 3D Look**

Veneers with synchronous pores effect. The pores synchronized with the woodgrain pattern optically emboss it, which leads to creation of a three-dimensional effect. These decors perfectly imitate natural veneer.

Hard Edge R door leaf profile

Aesthetically rounded edge with a 5 mm radius. Practical the solution guarantees greater security, e.g. of ours children as well as easier care.

**Classen Iridium**

A very high scratch and wear resistant laminate, consists of few layers of paper which undergo the process of hot press lamination with the use of special glues, covered with scratch resistant overlay lacquer. Its main advantage is a particularly high: scratch and wear, UV and chemical agents resistance as well as high aesthetic value due to maintaining the structure of the woodgrain.

Hard Edge B door leaf profile

Aesthetically executed, practical and always in fashion. This solution raises aesthetic value of the product and guarantees its quality and durability.

**Classen CPL**

A very high scratch and wear resistant laminate, created in the process of hot press lamination with the use of special glues, covered with scratch resistant overlay lacquer. Its main advantage is a particularly high: scratch and wear, high temperature, chemical and UV resistance.

Lacquered HDF board

Derivative wood product, characterised by high density, covered on one side with specialized ecological lacquer.

**Classen HPL**

Decorative laminate, 0.8 mm thick, based on thermosetting resin. It is created of several layers, which are composed of melamine decorative papers and with one or more reinforcing paper impregnated with resin. Additional use of special finishing layers and technological parameters determines the quality of the laminate and the scope of its applications. Laminates with such structure are characterized by a very high resistance to both chemical agents and mechanical damage.

Classen LAK PU

Smooth HDF surface coated with polyurethane varnish. Standard white Lac colour is an equivalent of RAL 9003. Quality used in RAL colours.

**Frame construction**

It consists of single elements, made entirely from wood-based material - MDF, veneered with Classen decors, joined together with the use of solid assembly dowels.

Classen LAK UV, UV Pure

Smooth HDF surface, covered with ecological UV cured varnish. Standard White Lac colour is an equivalent of RAL 9003.

**Honeycomb**

Highly specialized cardboard with a construction and structure similar to honeycomb, used as a standard stabilizing filling between construction / peripheral frame of a door leaf.

Perforated chipboard

Construction consisting of derivative wood perforated chipboard placed between peripheral frames made of softwood. Such construction of a door leaf guarantees high stability and increased sound absorption.

**HLT chipboard, acoustic**

A construction consisting of full chipboard with increased acoustic parameters, placed between a peripheral frame made of softwood and plywood.

Chipboard

A construction consisting of full chipboard, placed between peripheral frame made of softwood and a plywood. Such construction of a door leaf guarantees a high stability and very good sound absorption.

**Acoustic resistance**

Doors with increased acoustic resistance. Guarantee of full comfort and freedom of action.

Classen Hard

Reinforced peripheral frame, consisting of two construction elements: Peripheral frame made of softwood and derivative wood board, filled with highly specialized cardboard. This solution guarantees increased rigidity of a door leaf and resistance against warping.

**RAL colours**

Possibility of finishing the door in RAL colours for additional payment. Table of charges on page 142. Minimum order quantity - 3 sets (door leaf + frame). All collections in RAL are finished in polyurethane varnish quality.

Anti-burglary door

Internal entrance door, fulfilling the requirements of RC2 class anti-burglary protection, provide better security for your flat.

**EI 30**

Fire door designed for use as internal entrance doors in residential housing, public utility and collective residential buildings. Thickness of a door leaf - 50 mm.

EI 60

Fire door designed for use as internal entrance door in residential housing, public utility and collective residential buildings. Thickness of a door leaf 60 mm.

minimalism and elegance
FOR A COLOUR TO BE BROKEN

LACQUERED DOORS

A perfect combination of modern design and high quality workmanship. A real treat for perfectionists. In our collections, they most often appear in the colour of timeless white, which makes them a great means to enlarge the interior optically. The minimalism of decorations gives them an elegant character. The surface of the leaves finished with varnish is perfectly smooth. Aesthetics go hand in hand with usability. The doors are easy to clean and care. They are also distinguished by high durability and resistance to damage, so they become a good investment for years.

DO YOU LOVE VIVID COLOURS?

Do you feel that they express your personality? Don't give up on them! C doors will harmonize beautifully with even the craziest palette of colours, while introducing balance in the interior design.

DO YOU PREFER SIMPLICITY AND MONOCHROMATIC COLOURS?

You will find them in lackquered doors with a minimalist design. Thanks to them you will emphasize the elegant and subdued character of your apartment.

WIDE CHOICE OF MODELS

FRAMED DOORS

Classic at its best. A great proposition for those who instead of succumbing to seasonal fashions, choose timeless elegance. The framed construction provides the leaves with stability and increased resistance to damage. Inside the strong frame there are various types of fillings, including coffers, glazing, HDF panels and even mirrors. The variety of available models not only provides a real feast for the eye, but also a comfortable choice for future users. Choosing the door that best suits individual preferences and is precisely tailored to the needs of buyers.

DO YOU WANT TO GIVE SOME WARMTH TO THE DECOR?

For this purpose, wood is great. Not only on the floor, but also on the door leaves. Wood-like veneers with a three-dimensional structure will enhance the feeling of cosiness.

INTERIOR CLOSE TO NATURE. Live plants, woven baskets and ecological decorations create a wonderful atmosphere. It will be complemented by wood structure framed door, which you can easily adapt to the colour scheme of your apartment.

versatile use
WIDE CHOICE OF DECORS

veneer panel doors

Universal and thus guaranteeing versatile use. They are perfect for every room - from the kitchen, through the living room, to the bathroom. With their help, you can create a consistent decor of the entire apartment or house. The veneers covering the leaves are durable and resistant to scratches. Their advantage is also the variety of designs that fit into current trends and reflect the texture of the wood. Among them you can find not only classic beige and brown, but also shades of white, grey or anthracite. This rich palette of decors allows you to easily adapt them to any style of arrangement.

SCANDINAVIAN INTERIOR WITH A BOHO NOTE.

An interesting combination for those who are looking for a way to break the simplicity of Scandinavian style. It is worth completing the arrangement of the door in white veneer, reflecting the texture of wood.

CLASSICS - YES, BOREDOM - NO. Are you looking for a timeless door that stands out at the same time? Bet on the leaves finished with veneer. You can choose from many different colours. You will definitely find one that will create a coherent composition with the other elements of the decor.

SAGA

EXECUTION STANDARD

functionality and aesthetics
HIGH QUALITY

TECHNICAL DOORS

They represent the highest standard of performance and the best technical parameters. Their quality is confirmed by numerous approvals. Depending on the collection, they perform different functions: provide good sound insulation, fire protection, anti-burglary properties. Their common feature is a reinforced structure using materials of increased strength and durability. They are proof that functionality can go hand in hand with aesthetics. It's an excellent choice for public spaces, including offices, hotels, gastronomic and service premises. This group also includes entrance doors intended for use in residential and commercial buildings.

FUNCTIONALITY OR NICE APPEARANCE?

You don't have to choose. No more compromises. Our technical doors have everything - excellent usability and aesthetics pleasing to the eye.

FOR THE OFFICE, HOTEL AND RESTAURANT.

Wherever high quality, good technical parameters and solid workmanship are important. Choose a door that will not let you down. Ideal for public utility buildings.

unconventional, surprising
ORIGINAL SOLUTIONS

DOORS ALIGNED WITH THE WALL

Chameleon among the doors. No door frames, hidden door frame and hinges, and a door leaf that perfectly merges with the wall - together they open up endless possibilities of personalization. DIYers, artistic souls and people seeking original solutions cannot pass by indifferently. The primed surface of the leaf is like a clean canvas that encourages the imagination and decorating it according to your own idea and vision. By choosing the identical finish of the wall and door, you can create a kind of secret passage. Only the door handle will reveal its presence in the interior. Ready to experiment?

ARTISTIC SPACE.

The trick is to organize four walls so that they inspire and encourage you to stay inside for longer. The key to achieve this goal is the Compact door, finished according to your vision.

UNCONVENTIONAL SOLUTIONS.
Compact doors stimulate the imagination and encourage creative thinking. Ideally suited to modern interiors, both the small and the large ones.

floor: Classen Villa 4V L3750

COMPACT

The Compact system consists of interior door leaf, veneered or for self-finishing and an aluminium door frame. After assembly, all elements constitute an aligned surface with the wall.

EXECUTION STANDARD

- boarded door leaf, full, thickness: 40 mm
- Classen Hard structure
- external door leaf - non-rebated, outward opening (height 2022 mm)
- internal door leaf - rebated, inward opening (height 2032 mm)
- surface finishing: primed (surface prepared for self-finishing, e.g. painting*), 3D Look and Iridium veneers, CPL and HPL laminates
- single leaf 60'-100'
- two openings for hidden hinges, adjustable (3 hinges for the width of 100' and height from 2222 to 2332 mm)
- magnetic lock for regular key, mortise lock, bathroom key, cylinder lock

* tests conducted using original wall paints available on the market

OPTIONS FOR ADDITIONAL PAYMENT

VENTILATION

- ventilation undercut
- ventilation undercut 15mm (recuperation)

CONSTRUCTION

- perforated chipboard
 - width 100': **+20%**
 - height 2132, 2122 mm: **+30%**
 - height 2232, 2222 mm: **+35%**
 - height 2332, 2322 mm: **+40%**
- Additional payment for width and height apply to the door leaf and the frame.

ACCESSORIES

- falling threshold

DOOR FRAMES

Aluminium door frame, available in **internal** and **external** version, raw, with a possibility of self-painting after previous impregnation.

The package includes: 2 or 3 hinges, gaskets, impregnating agent, installation instruction and accessories necessary for its installation. Installation of the frame on a raw wall requires application of plaster or plaster-cardboard panels.

Compact system doors are available in all decors from the following groups: Primo, 3D Look, Iridium, CPL, HPL, Lacqueredowane (more on page 150-151)
HPL decors only standard offer.

comfort and freedom
FOR EVERY ROOM

SLIDING DOORS

A way to create an original entrance to the room. They ensure comfortable use and freedom of movement. They are fantastic in small spaces, where using traditional doors requires sort of gymnastics. They also do a great job on a larger surface, catching the eye and giving the interior a modern, dynamic character. They are available in single and double leaf versions. They also differ depending on the mounting method - they can be retracted into the wall or intended for on-wall mounting. Leaves can be chosen from many models with different aesthetics, which is why everyone will find an option ideally suited to their interior.

DO YOU WANT TO SAVE A PLACE IN THE FLAT?

Sliding doors will help you with that. Thanks to the convenient way of opening and closing, they do not use additional space. Especially recommended for interiors where every centimetre is important.

UNOBVIOUS DECORATION.
The door can play the first violin in interior design. Especially double-leaf models that look very impressive. In spacious rooms they will hit the bullseye.

DOUBLE LEAF SLIDING SYSTEM

SINGLE LEAF ON-WALL SLIDING SYSTEM

Single leaf on-wall sliding system consists of a masking element (including a doorstop), sliding system installed in the regulated door frame tunnel or directly on the wall.

Single leaf sliding system is offered in the following dimensions: 60', 70', 80', 90', 100'.

DOUBLE LEAF SLIDING SYSTEM

Double leaf on-wall sliding system is opened synchronously, i.e. by sliding one leaf, both door leaves open at the same time. Synchronous system requires ordering from us two door leaves of the same width. This system is also installed in the regulated door frame tunnel or directly on the wall.

Double leaf sliding system is offered in the following dimensions: 120', 140', 160', 180', 200' (for doors opening synchronously).

Door leaves for the sliding system are executed in non-rebated version in the external dimensions of the rebated door. e.g.: 844 x 2035 mm (80').

THE FULL SLIDING SYSTEM CONSISTS OF:

Single door leaf system:

sliding mechanism + masking element (with a doorstop) + 1x door leaf

Double door leaf system:

synchronous sliding element + masking element + 2x door leaf

Availability:

Sliding system is available in all decors and collections apart from the following collections: Classic, Andromeda, Salvano, Ksantos New.

Vertical cross-section of the sliding system

Door closer

Classen sliding doors are available in all decors from the following groups (detailed information - page 150-151) and optionally in RAL colours.

DIVA

Diva system, thanks to wide, aluminium rail, partially integrated with the door leaf creates aesthetic and modern combination of doors and the sliding system.

The system consists of a mechanism and a door leaf, and it is designed to be installed directly on the wall (lack of possibility of installation with a tunnel).

Door leaf: sliding, single leaf, HARD construction, equipped with steel INOX handgrip as a standard. Dedicated exclusively to Diva system.

Door leaf dimensions - 744, 844, 944 x 2135 mm.

Mechanism: a full set consists of a 2m aluminium rail, fittings and installation instruction.

Two types of the mechanism are available - standard one and the one with self-closing system. After installation of the system, the gap between the door leaf and the wall is 12 mm.

Door leaf with a rail - connection method

DESIGN WALL SLIDING SYSTEM

Sliding doors means a freedom of moves and the ease of movement. Attractive decors, shiny stainless steel and the highest comfort are combined in one impressive door, allowing smooth opening and closing the room.

Design wall sliding system

The system is made entirely of stainless steel, designed for mounting directly on the wall, available only in single leaf version.

Door leaves for the Design sliding system are manufactured in non-rebated version (dimensions as for rebated doors). Available in the following collections: Natura HR, Asteria, Discovery, Tetyda, Demeter and in frame collections.

Packing

It includes the full sliding system with a rail - length 2100 mm, on which door leaves - width 70', 80', 90' can be installed.

Door pulls installed in sliding doors for additional payment. A colour of a door pull adjusted to a chosen door decor - page 113.

Steel door pulls
silver (INOX)

Stainless steel railing
500 mm, double-sided

Wall sliding system with a door stop

Table for openings in the wall:

	width	height
70'	702	2010
80'	802	2010
90'	902	2010

It is based on CLASSEN interior single or double leaf non-rebated doors.

The structure of the system made of metal sections consists of a pocket, in which a leaf hides during „opening of the door“.

IN-WALL SLIDING DOORS SYSTEM

CMOK

Adjustable door frame, designed to be installed on steel door frame, without the need to dismantle it beforehand. It allows the exchange of door leaves while maintaining their current dimensions. A distinctive feature of this door frame is a quick and easy installation possible owing to permanent fixture of two base elements. The door frame is fully made of wood-based material - MDF covered with Classen Primo, 3D and Iridium and CPL laminate.

Packing:

A complete door frame is available in two adjustment ranges: 70-110 mm and 110-150 mm. Both ranges are available in a single package, which also contains gasket and assembly bag. For door leaves of dimension 100' and reinforced door leaves, it is required to use a door frame with three hinges.

Classen Primo: Acacia ST, Natural Oak, Beech, Polish Oak, Walnut, White.

Classen 3D Look: Sonoma Oak, White Ash, Burnt Oak, Oiled Oak, Light Columbia Walnut, Riviera Oak, Grey Oak, Nordic Oak, Anthracite Oak, Catania Oak,

Classen Iridium: Snow Ash, Brown Ash, Graphite Ash, Wenge, Marone Oak.

Classen CPL: Italian Walnut, Acacia, Acacia light, Norwegian Ash, Kendal Oak, Grigio Oak.

WOOD-BASED AND STEEL DOOR FRAMES

EXECUTION STANDARD

Hybryda door frame is designed for BORD B, W and W3 internal entrance door leaves.

It consists of Hybryda steel door frame and regulatory element. When installed, they create one whole.

Depending on the direction of opening the door, the regulatory element may relate to the colour of the joinery inside the flat or be a decoration of the staircase.

Packaging:

Hybryda steel door frame and regulatory element are packed in two separate packages.

COLOURS

Regulatory element is available in the following decors:

Classen Iridium: Snow Ash, Brown Ash, Graphite Ash, Wenge.

Classen CPL: Acacia, Acacia light, Norwegian Ash, Italian Walnut, White, Grey 7047, Graphite 7024, Grigio Oak, Kendal Oak, White structure.

Hybryda steel door frame:

Powder coated door frame.

Kolory RAL: White (9003), Grey (7047), Graphite (7024).

STEEL ADJUSTABLE

Adjustable steel door frames are designed for installation in different types of rooms with completed walls and floor - flats, public utility building, hotels, etc. Durable construction enables application both in masonry walls as well as gypsum boards walls.

Construction:

- Made of high quality steel plate, thickness 1.5 mm.
- The full door frame consists of one base element, hinges, gasket and full set of cover caps.
- gaskets available in three colours - white, grey, brown.
- two hinges as standard; third hinge as option without additional payment.

Surface finishing:

- Powder coated door frame. RAL colours: White (9003), Grey (7047), Graphite (7024).
- Other RAL colours as well as other custom features are subject to individual pricing.

14x80 moulding can be also installed as a wall base moulding.

Application:

Finishing mouldings are used for masking the places of connection between walls and a door frame. 14x80 moulding can be also installed as a wall base moulding.

It is possible to install finishing mouldings with small nails.

Packing:

One package contains three finishing mouldings for re-cutting to match single or double leaf doors.

For single leaf door: 2x vertical element 2160 mm, 1x beam 1160 mm.

For double leaf door: 2x vertical element 2160 mm, 1x beam 2350 mm.

REGULATORY STRIP WITH TONGUE 60 MM

Application:

The strip is an optional element designed for adjustable door frame.

Regulatory strip with longer tongue increases the adjustment range by 17mm.
